

The EKOenergy Secretariat
confirms that

Toyota Baltic - Tallinn office

has a contract for the supply of
EKOenergy-labelled renewable electricity.

The electricity is supplied
by EKOenergy's Licensee
Imatra Elekter.

Steven Vanholme
Programme Manager

Thank you for your purchase of EKOenergy-labelled electricity!

EKOenergy guarantees that the electricity you buy is sourced from both renewable and sustainable power plants.

As a user of EKOenergy, you have the right to use [our EKOenergy logo](#) in your communications and on your products. We are happy to provide photos and texts for your publications, feel free to get in touch.

EKOenergy is an independent, nonprofit, international ecolabel. We only label electricity that fulfils our strict sustainability criteria. So your electricity comes from power plants that cause minimal possible damage to the environment and biodiversity.

You also help us as an environmental initiative to promote climate friendly legislation. EKOenergy is supported by a network of 45 environmental organisations that aim to raise awareness of sustainability issues and promote renewable energy.

EKOenergy's Climate Fund

At least 0.10€/MWh of your electricity purchase goes towards EKOenergy's Climate Fund.

The Climate Fund finances renewable energy projects in regions of the developing world facing significant energy poverty. The projects are managed by experienced organisations with strong local cooperation. These projects address several Sustainable Development Goals and would not be possible without your support.

For more information about EKOenergy and the Climate Fund, please visit: www.ekoenergy.org
